# PERSONA

**BRIAN, 29**

Key Account  
Exec in an MNC

"I'd like to learn new skills  
but I'm tired from work and  
don't have time."

"I'm very interested in crypto  
but I don't know nearly  
enough."

"I want to start a business  
someday but that's a huge  
what if."

"I believe I should save up for  
that future. I won't be working  
forever."

# WHAT IS FinLearn?

## CURATED

courses to meet  
requirements

## SHORT

duration  
5 - 15 mins

## INCENTIVES

earn LTE tokens

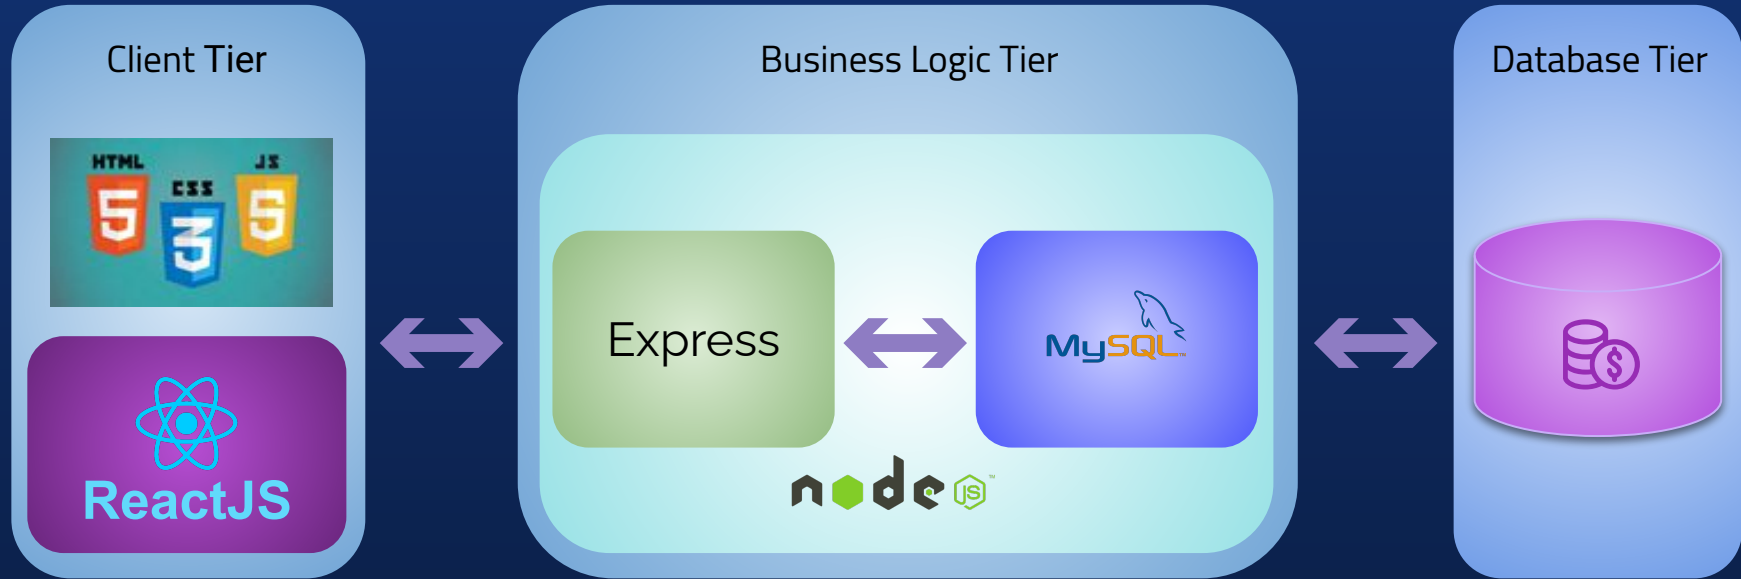

# DEMO

# TECHNOLOGY STACK

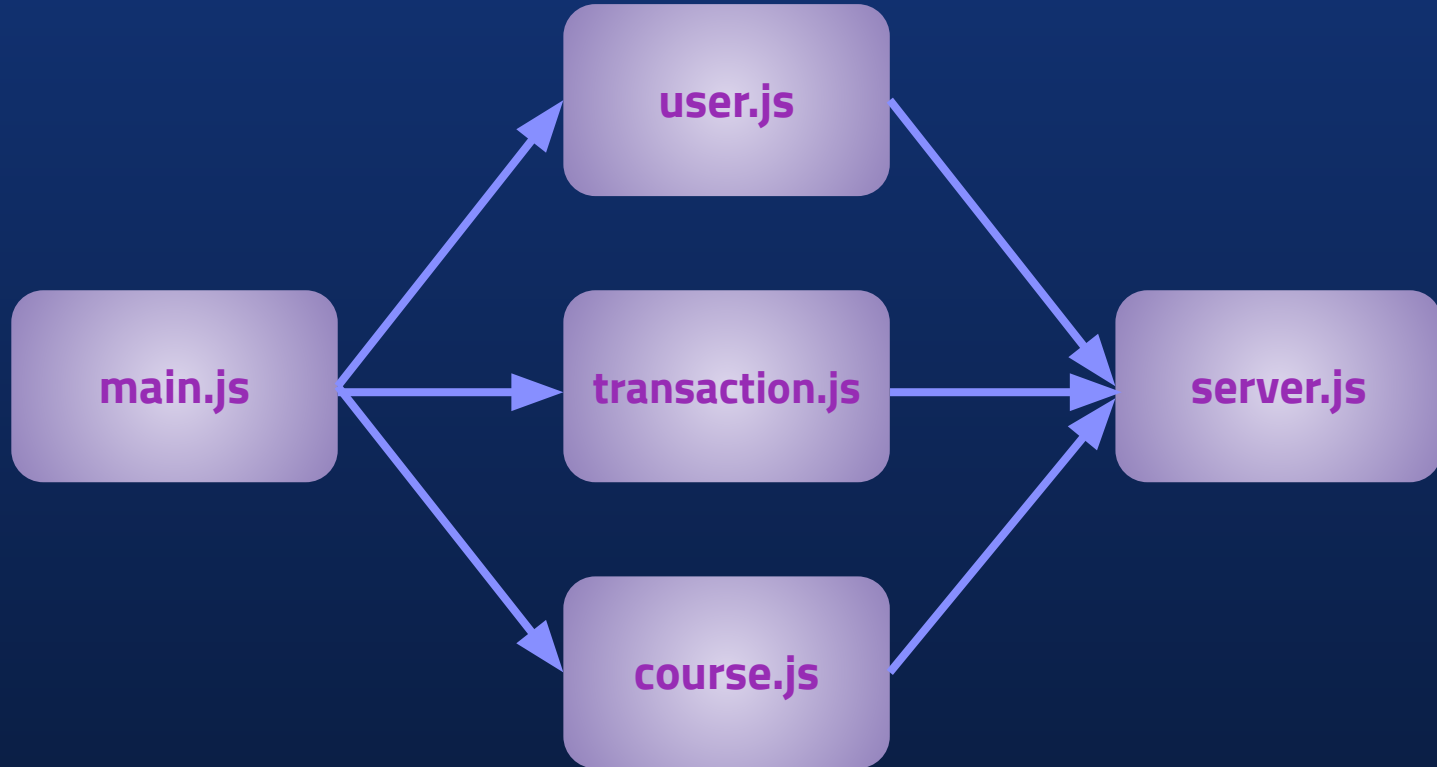

# ER DIAGRAM

user		
	id	varchar(40)
	name	varchar(50)
	email	varchar(50)
	signup	timestamp
	verified	boolean(1)
	wallet	integer(11)

transactions		
	id	integer(5)
	signup	timestamp
	completed	timestamp
	user	varchar(40)
	course	varchar(14)

course		
	id	varchar(14)

# PROJECT ORGANISATION

# DOCUMENTATION & REPOSITORY

[FinLearn \(getpostman.com\)](https://getpostman.com/FinLearn)

<https://github.com/derekpung/FinLearn-FrontEnd.git>

<https://github.com/derekpung/FinLearn-BackEnd.git>

# API JOURNEY

## /profile

Check whether user exist:

**Get /user/by-uid**

If user does not exist:

**Post /user/add**

To display completed courses:

**Get /transaction/status/by-user-complete**

/

Landing page for  
Auth0 login

## /explore

Show courses:

**Get /course/all**

## /explore/course?id=

Show course details:

**Get /course/by-cid**

Add transaction if start button clicked:

**Post /transaction/add/by-uid-cid**

## /explore/classroom?id=

Show course video and completion  
button:

**Get /course/by-cid**

Upon completion, update transaction  
and wallet:

**Put /transaction/update/by-uid-cid**

**Put /user/wallet/update/by-uid-cid**

## WENT WELL

**local database** with basic information

connectivity through API to show **wallet balance**

usage of SkillsFuture **API** for course information

development and sharing of code through **GitHub**

## DIDN'T WENT WELL

inclusion of **quiz table** to show results after course completion

Mechanism for **error validation**

show **profile details** about course providers and mentors

not enough time to work on the **aesthetics** of the app

# WHAT WOULD WE HAVE DONE DIFFERENTLY?

More APIs

Incorporate APIs from various different course providers

Additional Tables

Enhanced database with more tables - enrollment, quiz, mentors etc.

Database on Cloud

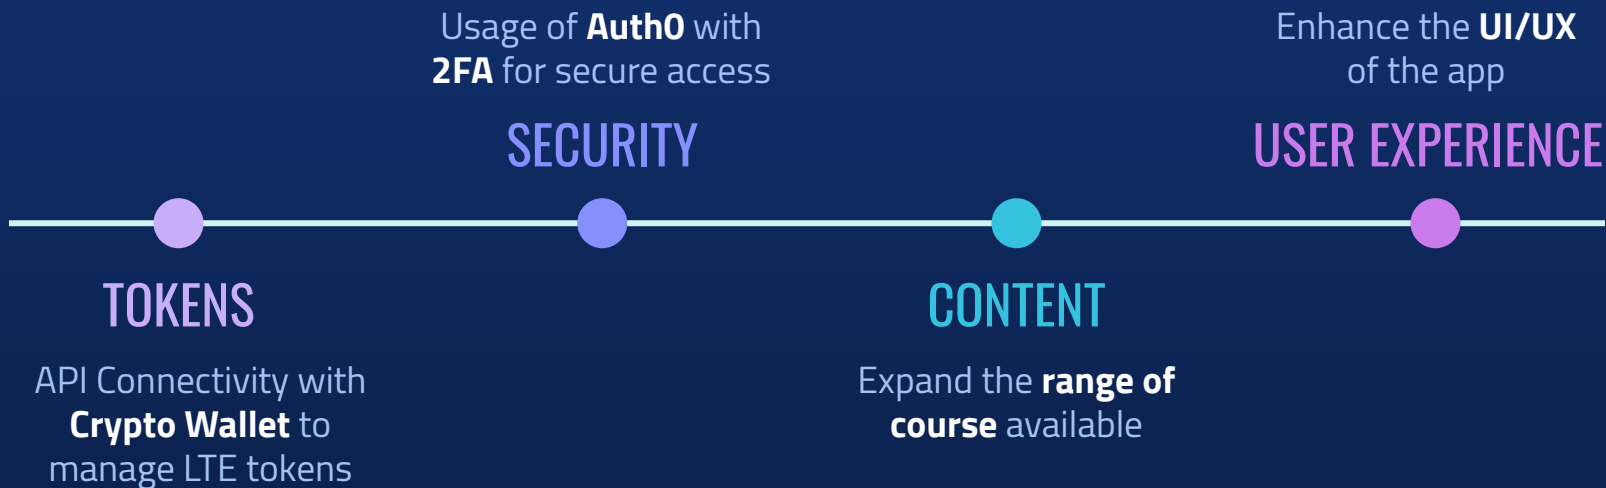

Host the database on Cloud allowing pilot users to access and test

# FUTURE ENHANCEMENTS

# THANKS
